## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "block copolymerization type" is indefinite as to scope and meaning.

In claims 11 and 12, "positive type" is indefinite as to scope and meaning.

### ***Claim Rejections - 35 USC § 102/103***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Japanese 11-202488.

JP '488 discloses photosensitive polyimide compositions wherein the polyimide is obtained from a tetracarboxylic dianhydride and a diamine using an acid catalyst generated by a lactone and a base. The polyimide is soluble in solvents inclusive of ketones, ethers and esters.

Art Unit: 1711

The examples provide various polyimides meeting the requirements of the present claims both in terms of the types of materials added. The onus is shifted to applicants to establish that the product of the present claims is not the same as or obvious from that set forth by the claims.
